### Comments

#### SEPISOFT™ SP

An innovative functional PMMA for a “3D” texturing effect : skin feel-stability-adhesion. SEPISOFT SP is a multifunctional powder ; easily dispersible in aqueous & oil-based medium, the SEPISOFT SP offers in first a powdery softness and a silky finish to all your formulas, liquids, solids or powders. Introduced in continuous aqueous media, its also brings a stabilizing effect allowing to create innovative & stable self-suspensions and “Pickering” emulsions without any surfactant. SEPISOFT SP reveals its third winning card in powder formulas : strengthened adhesion of the powders on the skin leading to more intense colour and long lasting effect.
