Raw materials from SEPPIC

SEPIlift™ DPHP

Dipalmitoyl Hydroxyproline

Plant-derived hydroxyproline "Lipovector", this product has anti-wrinkle (effectiveness proven in vivo), moisturized and toning properties (contraction of the collagen fibers, protection of dermal fibers from enzymatic lysis and anti-free radical action). Sepilift™ DPHP has intrinsic emulsifying properties which give a specific touch to the emulsion.

LANOL™ 99

Isononyl Isononanoate

Texturing agent which improves consistency and stability of the formula, without any soaping effect.

MONTANE™ 20

Sorbitan Laurate

Non-ionic emulsifier with a lipophilic tendency, MONTANE™ 20 is a fatty acid ester and sorbitan derived from vegetable origin (HLB=8.6).
