Raw materials from SEPPIC

MONTANOV™ 202

Arachidyl Alcohol & Behenyl Alcohol & Arachidyl Glucoside

Glucolipid emulsifier in harmony with nature. It produces emulsions with a very light and evanescent touch, which guarantees an easy application and a quick penetration. Their matt effect prevents skin from glossy and fatty aspect. Thanks to liquid crystals which contain water, Montanov™ 202 contributes to keep skins moisturized.

SEPIlift™ DPHP

Dipalmitoyl Hydroxyproline

Plant-derived hydroxyproline "Lipovector", this product has anti-wrinkle (effectiveness proven in vivo), moisturized and toning properties (contraction of the collagen fibers, protection of dermal fibers from enzymatic lysis and anti-free radical action). Sepilift™ DPHP has intrinsic emulsifying properties which give a specific touch to the emulsion.

SESAFLASH™

Glycerin & Acrylates Copolymer & VP/Polycarbamyl Polyglycol Ester & Hydrolyzed Sesam Protein PG-Propyl Methylsilanediol

This original and patented association containing Sesame enables skin to be instantly and visibly smoothed. Rejuvenation, firmness and comfort guaranteed ! (in vivo proven effect).

SEPIplus™ 265

Acrylamide / Ammonium acrylate copolymer & Polyisobutene & Polysorbate 20

Thickening agent in liquid form very easy to use (no predispersion or neutralization). Sepiplus™ 265 gives an improved electrolyte resistance over a wide pH range (pH 5.5 to 11).
