Raw materials from SEPPIC**FLUIDANOV™ 20X****Octyldodecanol & Octyldodecyl Xyloside**

Water-in-oil emulsions. Extra-Fluid, FLUIDANOV™20X is easy to use. It allows to carry out multiple emulsions. This novel formulation method guarantees surprising textures, uniting of freshness and cushion effect. Validated by ECOCERT®

SEPILIFT™ DPHP**Dipalmitoyl Hydroxyproline**

Plant-derived hydroxyproline "Lipovector". An anti-wrinkle ingredient, it moisturizes the skin and reduces the appearance of visible signs of aging (effectiveness proven in vivo). SEPILIFT™ DPHP firms skin tissues by stimulating the contraction of the collagen fibers. It protects dermal fibers from enzymatic lysis and exerts an anti-free radical action. SEPILIFT™ DPHP has intrinsic emulsifying properties and also gives the emulsion a specific feel. Validated by ECOCERT®
