## Raw materials from SEPPIC

### CAPIGEL™ 98

#### Acrylates Copolymer

Ready-to-use thickening liquid polymer that creates high viscosity in aqueous media following neutralization (pH> 6.5). It also produces perfectly clear gels with a good resistance to electrolytes and polar solvents.

### OLIGOGELINE™ PF

#### Chondrus Crispus Extract

Filmogen active extracted from red alga to protect and hydrate the skin and the hair.

Sensorial active “Silicone Plant” with guaranteed effect up to 2% (in vivo study)

### ADIPOSIM™

#### Sorbitan Laurate and Lauroyl Proline

A dual action to correct existing “orange skin aspect” inhibits and eliminates fat storage for “Top Model” shape adipocytes (in vivo and in vitro proven efficacy versus placebo). Ecocert approved.

### AMONYL™ 380BA

#### Cocamidopropyl Betaine

Provides a fine foam that is stable over time. Ecocert approved.
