## Raw materials from SEPPIC

### FLUIDIFEEL™ EASY

#### Lauryl Glucoside & Myristyl Glucoside & Polyglyceryl-6 Laurate

Glycolipidic O/W sustainable emulsifier, from 100% vegetable origin and MB certified (BVC-RSPO-1-1972708497). Processable at room temperature for time and energy savings. Sprayable and able to efficiently stabilize low and very low viscosity formulations (serum, lotion, mask, wipes, spray...). It gives light textures, for a nude skin sensation, comfortable and soft.

### SEPIMAX ZEN™

#### Polyacrylate Crosspolymer-6

Powder polymer with a MAXIMUM resistance to electrolytes thanks to its high associative behavior. Stable from pH 2 to 8, it enables the creation of formulas with a specific skin feeling, included foaming formulas: rich, velvety and elegant. It is now possible to formulate transparent aqueous gels, cream-gels and emulsions with any kind of active ingredients and to achieve ZEN.

### SEASHINE™

#### Aqua / Water / Butylene Glycol / Algae Extract

Water soluble easy to use active which has shown *in vitro* efficiency on pigmentation key genes. Lightning effect *in vivo* proved.

### LANOL 99

#### Isononyl Isononanoate

Emollient agent. Polar ester. Soft and light touch, non greasy finish and short play-time.
